

Add Allergen Related Information

What to Fill Out for Allergen Information:

1. Allergen Declaration Indicator:

- Set to "True" when all provided allergen information is complete.
- Set to "False" when not all allergen information is known.
- Set to "True" when allergen information is not provided because there are no allergens.

2. Allergen Type Code:

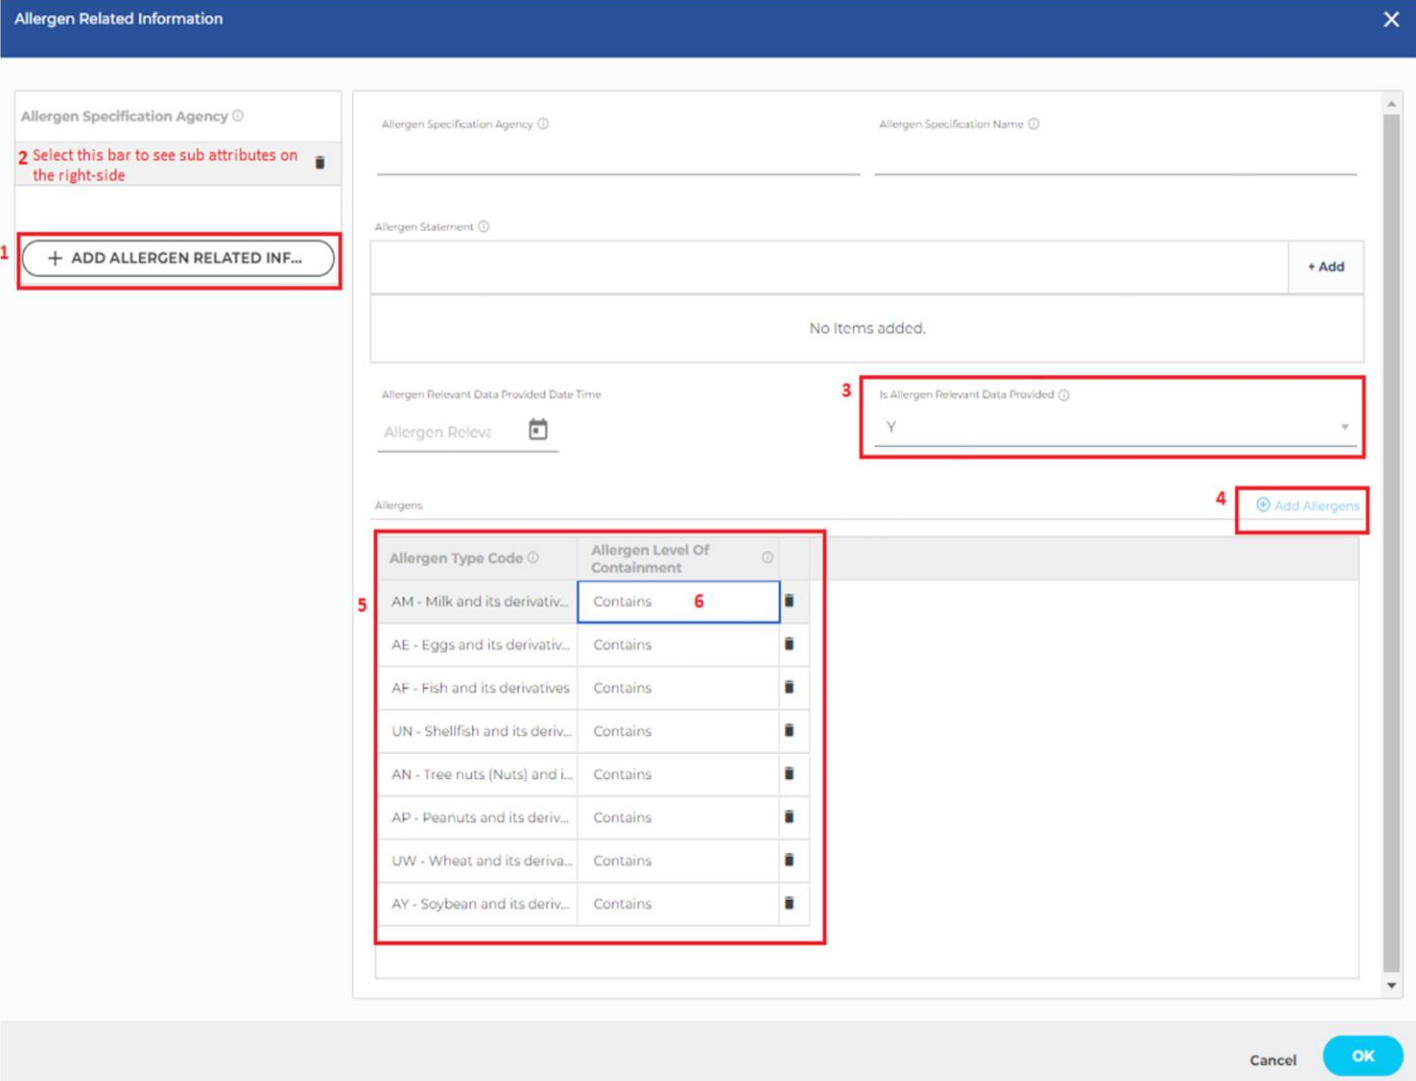

- This code specifies a particular allergen.

3. Allergen Level of Containment:

- This code indicates the precision or level of detail regarding an allergen's presence in a product.

The "Big 8" Food Allergens in the United States with GDSN Codes/Abbreviations:

- Milk (AM)
- Eggs (AE)
- Fish (AF)
- Shellfish (UN)
- Tree Nuts (AN)
- Peanuts (AP)
- Wheat (UW)
- Soybeans (AY)

The screenshot shows the 'Allergen Related Information' form. It includes fields for 'Allergen Specification Agency', 'Allergen Specification Name', 'Allergen Statement', 'Allergen Relevant Data Provided Date Time', and 'Is Allergen Relevant Data Provided'. There is a table for 'Allergens' with columns for 'Allergen Type Code' and 'Allergen Level Of Containment'. The form also has a '+ Add Allergen Related Inf...' button and an '+ Add Allergens' button. Numbered callouts 1 through 6 highlight specific elements: 1 points to the '+ Add Allergen Related Inf...' button; 2 points to a red instruction bar; 3 points to the 'Is Allergen Relevant Data Provided' dropdown; 4 points to the '+ Add Allergens' button; 5 points to the 'Allergens' table; and 6 points to the 'Contains' level of containment for the first allergen entry.
