

The **Nutrient Format Type Code Reference** must be filled out first before adding a Nutritional Panel. The client must select **US_FDA_NFP_2020_STANDARD**

What to add in the Nutritional Panel:

1. **Metric Serving Size:** Specify the serving size in metric units.
2. **Serving Size Description:** Provide a description of the serving size.
3. **Preparation State:** Indicate the state or condition of the product (e.g., cooked, raw, frozen) for which the nutritional information applies.
4. **All Applicable Nutrients:** Include all relevant nutrients with their corresponding Quantity Contained and Daily Value % values.
