

Completing a GDSN NISS(New Item Setup) Request

Contents

Overview	1
GDSN Supplier	2

Overview

New Item Setup (NISS) is a tool within CES that allows recipients to issue requests to suppliers for new item information on specific items. These requests are sent to both GDSN and non-GDSN suppliers.

A recipient will send these requests for specific items that need to be added to the catalog. GDSN suppliers can always publish their entire catalog to the recipient via GDSN in which case a NISS request is not needed. If a specific item has not been published, however, then the recipient will initiate the NISS request.

GDSN Supplier

If a GDSN NISS request is sent to a supplier, an email will be sent with the basic item information and option buttons to Submit or Reject.

Great News! Demo Staging Recipient - GDSN has requested information on one of your products.*

Requested by: Melinda Gulledge (melinda.gulledge@syndigo.com) | Request ID: 102191 | Request Expires: 03/06/2024 16:55

Product Code:	123456
Product Description:	test item GDSN
Brand Name:	test
Vendor ID:	1010
Vendor Name:	Demo Account Foodservice
Distributor Division ID:	
Distributor Division Name:	
Buyer E-mail:	melinda.gulledge@syndigo.com
