Overview

DPI Specialty Foods implemented Global Data Synchronization Network (GDSN) to receive accurate, complete and timely product content from its supplier partners. DPI Specialty Foods is requesting suppliers to utilize GDSN as the method to send their product content.

This document is intended to assist suppliers in understanding the attribute requirements and steps to start synchronizing the product content with DPI Specialty Foods via the GDSN. DPI requests suppliers to publish all the GS1 GDSN Attributes as referenced in the link in section 3.3.

For synchronizing product content with DPI Specialty Foods via the GDSN, suppliers will need to subscribe to a GDSN certified data pool such as Attribytes.
