

FSMA 204 Attributes –Data Validations

When a food GPC code is selected, the following warning data validation and CIC messaging will be triggered. This will not prevent publication or require the field to be filled

The screenshot shows a web interface with a 'Regulatory Information' section containing a button 'Add Override' and a box showing '0 values'. A yellow warning icon is present. A 'Data Quality (1)' modal is open, displaying a warning message: 'Regulatory information with the Regulatory Act FSMA204 and its supporting attributes is required for some food products at least at one level of the hierarchy. Please verify if FSMA attributes should be completed. For more information on FSMA 204 click the link: <https://syndigo.com/fsma204/>'.

When Traceability Regulation is selected, a critical error will result If Regulatory act does not = FSMA204

The screenshot shows a web interface with a 'Data Quality (1)' modal displaying a 'Critical Error' message: 'Regulatory Act must be FSMA204 (Section 204 of the Food Safety Modernization Act) when Regulation Type Code must contains TRACEABILITY_REGULATION.' The form includes fields for 'Regulatory Type Code' (with a red error icon), 'Regulatory Act' (set to 'FSMA204'), 'Regulatory Agency', 'Is Trade Item Regulation Compliant', 'Regulation Restriction Community Identifier', and 'Regulation Restrictions And Descriptors'.

When Regulatory Act = FSMA204 a critical error will occur if Regulation Type does not = TRACEABILITY_REGULATION

The screenshot shows the 'Regulatory Information' form. The 'Regulatory Act' field is empty, showing 'No Value' with a red error icon. The 'Regulation Type Code' field is set to 'TRACEABILITY_REGULATION'. A 'Data Quality (1)' modal is open, displaying a critical error: '! Critical Error' followed by the text 'Regulation Type Code must contain TRACEABILITY_REGULATION when Regulatory Act is FSMA204 (Section 204 of the Food Safety Modernization Act)'. A 'Next Issue' link is at the bottom of the modal. The 'Regulatory Agency' and 'Regulation Restriction Community Identifier' fields are also visible.

See below for rule regarding “Is Trade Item Regulation Compliant”

The screenshot shows the 'Regulatory Information' form with 'FSMA204' entered in the 'Regulatory Act' field. The 'Regulation Type Code' is 'TRACEABILITY_REGULATION'. A 'Data Quality (1)' modal is open, displaying a critical error: '! Critical Error' followed by the text 'For Regulatory Act FSMA204 (Section 204 of the Food Safety Modernization Act) Is Trade Item Regulation Compliant must be TRUE or Is Trade Item Regulation Compliant must be NOT_APPLICABLE and Regulation Restrictions And Descriptors must contain KILL_STEP_APPLIED or NOT_COVERED_BY_FTL'. A 'Next Issue' link is at the bottom of the modal. The 'Regulatory Agency' and 'Regulation Restriction Community Identifier' fields are also visible. At the bottom of the form, it says 'No Items added.'

When “Is Trade Item Regulation Complaint = Not_Applicable then “Regulation Restrictions and Descriptors” Must be filled out. See Below
