

Advanced My To-Do's App

The application offers **Advanced My To-Do's App** to keep track of workflow activities; such as count of the workflow items, user assigned to workflow item, assigned date, and so on. The app is mainly designed to filter the workflow items based on the user-preferred classifications or global classifications. This helps customers to view the count of items based on user created or modified entity, selected entity type and category selection.

Target Audience

Suppliers, Merchandisers , Category Manager , E-Commerce Manager

Value Proposition

- **Initiator Tracking:** Say goodbye to confusion. Our app ensures that the initiator of a workflow is clearly identified and tracked throughout the entire process. You'll always know who initiated a workflow, providing transparency and accountability.
- **User-Preferred Product Category or Classification:** Tailor your workflow activities to your preferences. Define your product categories or classifications at the entity level, ensuring that your workflow aligns with your unique organizational structure.
- **Effortless Workflow Monitoring:** Keep tabs on your workflow activities effortlessly. The app provides comprehensive insights, including the count of workflow items, assigned users, creation dates, and more. Stay in control of your tasks with a user-friendly interface.
- **Dynamic Filtering Options:** Customize your workflow view. Our app allows you to filter workflow items based on user-preferred classifications or global classifications. Easily view the count of items associated with specific users, entity types, or chosen categories.
- **Enhanced Visibility:** Gain a deeper understanding of your workflow dynamics. Our solution provides a clear overview of workflow activities, empowering you to make informed decisions. Track user-created or modified entities, selected entity types, and category selections with ease.
