

Automotive - ACES Onboarding

ACES App focuses on establishing the single source of truth, of the vehicle-specific data that are shared with channel partners while adhering to the auto care standards. It is designed to allow an enterprise to use this offering and cover the most common challenges of the automotive industry. The offerings are built to manage vehicle information and can be leveraged to accomplish the business needs and achieve better business productivity.

Target Audience

- **Auto Parts Manufacturers:** Companies that produce automotive parts and need to communicate product fitment data efficiently.
- **Distributors and Wholesalers:** Businesses that distribute auto parts to retailers and need accurate fitment data to manage inventory and sales.
- **Retailers:** Auto parts stores and online retailers that require detailed product information to assist customers in finding the right parts.

Value Proposition

- **Industry standard adherence:** The ACES app allows you to onboard and manage the parts data while adhering the ACES data standards and also provide a single source of truth across the enterprise.
- **Compliance with ACES database changes:** The app features in updating the database like VCdb & Qdb along with PCdb, PAdb & PCAdb database changes on a 30days, 60 days or 90 days basis with keeping the previous 6 months database as a backup.
- **Seamless data onboarding and monitoring:** Allows to easily upload the ACES XML via vendor portal and monitor the status of the uploaded file.
- **Ensure accurate vehicle/catalog data:** The app allows us to ensure the part information submitted is accurate by performing the industry standard validations

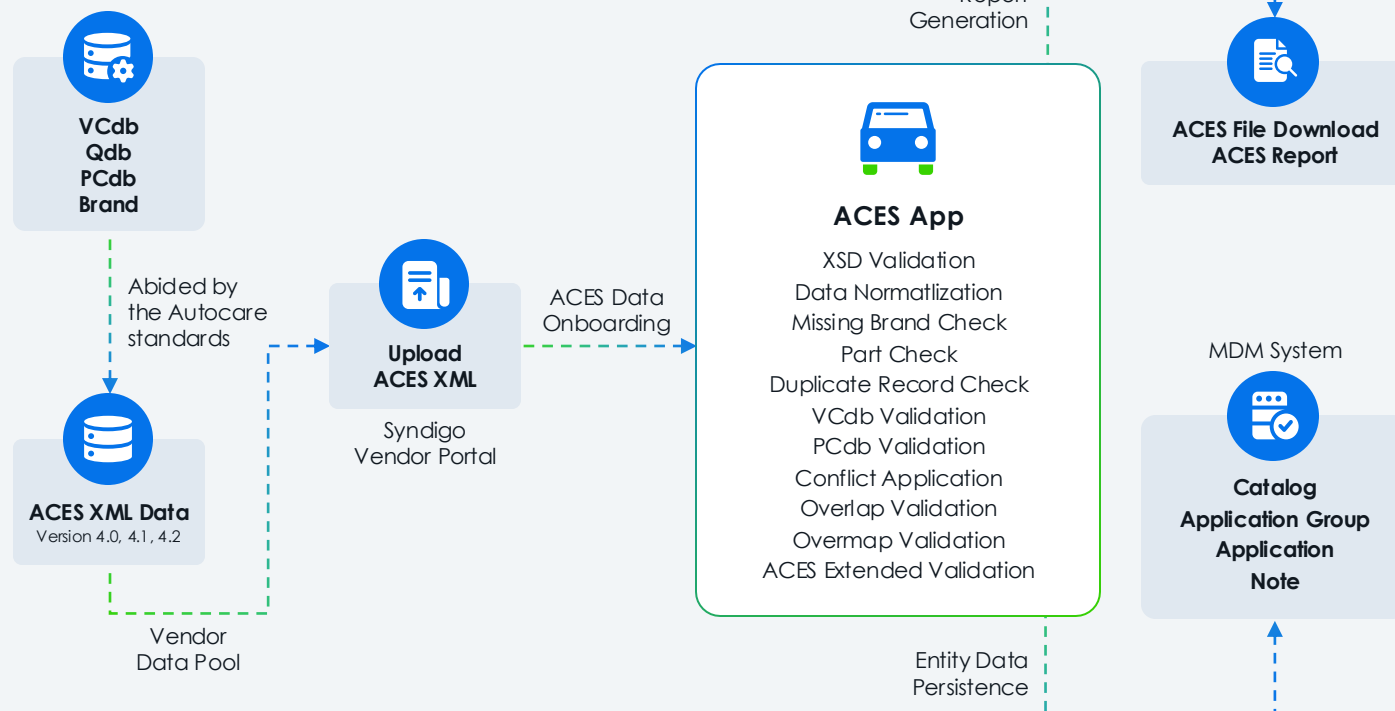

Key Features

- **ACES data onboarding:** Customers/Partners can upload the XML file directly to our application. The inbuilt Automotive Model helps to perform fewer validations during the import such as brand checks, duplicates, overlaps, note conflict checks, and so on that help businesses with good quality parts, applications, and vehicle data.
- **Industry Standard Validations:** Ability to validate the data as per the industry standards by validating the conflicting notes, conflicting applications, overlaps, and so on.
- **Catalog Management:** Provides a single view of parts and vehicle data. It helps to get the Qualifiers and notes. It also helps to manage fitment, special instructions, and so on.
- **Automotive Load Lineage:** Display the load history of each load for a catalog along with the net change history.
- **File Submission Report:** Ability to view the report of the ACES XML file submitted.
