

Entity Summary View App

The application offers an Entity Summary View App that allows you to render the entity summary widgets on the Entity Manage page. The entity summary view widgets comprise the insights of an entity and help you to visualize the associated details at an entity level

Target Audience

Merchandisers, Category Manager , E-Commerce Manager

Value Proposition

- **Effortless Data Access:** Navigate the data landscape effortlessly with the Entity Summary View App. Enjoy swift access to summarized insights about your products or services, eliminating the complexities of data retrieval.
- **Visualized Intelligence Widgets:** User-Preferred Product Category or Classification: Tailor your workflow activities to your preferences. Define your product categories or classifications at the entity level, ensuring that your workflow aligns with your unique organizational structure.
- **Holistic Entity-Level Understanding:** Gain a comprehensive understanding of each entity through tailored widgets. Dive deep into locale-specific details, attributes, context, and relationships, empowering you with a 360-degree view.
- **Instant Information Grasp:** Accelerate decision-making with quick access to the essence of your product or service at an entity level. Say goodbye to information overload as you focus on the specific widget that aligns with your informational needs.
- **User-Centric Design:** Experience a user-friendly design that ensures seamless interaction and interpretation of data. Customize your view effortlessly, tailoring your experience to match your preferences for a personalized touch.

Key Features

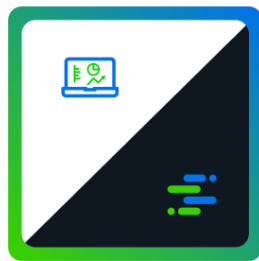

Ability to visualize the associated entity details at an entity level

Ability to create the widgets in Entity Manage page to display the details such as entity locale, context, attribute locale and so on
