

Scheduled Bulk Edit

The application offers Scheduled Bulk Edit App, which allows users to schedule the update or edit operation of bulk entities on a scheduled date. This helps organizations maintain the data, speeds up the response time, optimizes data storage, and improves the system's overall performance.

Target Audience

Suppliers, Merchandisers, E-commerce Managers, Supply Chain Managers, Administrators

Value Proposition

- **Time Efficiency:** Save valuable time by scheduling bulk edits for your product content. No need to manually go through each item; the app automates the editing process, allowing your team to focus on more strategic tasks.
- **Increased Productivity:** Boost your team's productivity with the power of automation. The app handles repetitive editing tasks, freeing up your team to engage in more impactful and creative aspects of content management.
- **Adaptability to Schedules:** Plan and execute bulk edits based on your business schedule. Whether it's updating pricing before a promotion or aligning with seasonal changes, the Scheduled Bulk Edit app allows you to set editing tasks in advance.
- **Cost-Efficient Content Management:** Optimize resource allocation and reduce operational costs associated with manual editing. The app offers a cost-effective solution for managing large volumes of product content efficiently.
- **Single Unified Interface:** Experience the convenience of a unified interface that brings together the richness of Tableau reports. Save time and enhance user experience by accessing all your critical business intelligence in one centralized location.
