Overview

Food Service Rewards implemented Global Data Synchronization Network (GDSN) to receive accurate, complete, and timely product content from its supplier partners. Food Service Rewards requires suppliers to utilize GDSN as the method to send their product content. This document is intended to assist suppliers in understanding the attribute requirements and steps to start synchronizing the product content with Food Service Rewards via the GDSN. Food Service Rewards requires suppliers to publish all the Foodservice GS1 GDSN Attributes as referenced in the link in section 3.3. For synchronizing product content with Food Service Rewards via the GDSN, suppliers will need to subscribe to a GDSN certified data pool such as Attribytes.
