Data Synchronization Implementation Guide

Version 1.2

December 2023

This Harbor Foods Group Data Synchronization Implementation Guide, any attachments thereto and any information contained therein are intended only for use by Harbor Foods Group and its subsidiaries Harbor Foodservice and Harbor Wholesale's electronic trading partners. You are hereby notified that any dissemination, distribution or copying of this document, any attachments thereto or any information contained therein is strictly prohibited except for the purposes of implementing data synchronization with said companies.

OVERVIEW

This document is intended for Suppliers who will be sending product data to Harbor Foods Group (HFG) and its subsidiaries Harbor Foodservice (HFS), Harbor Wholesale Lacey (HWG), and Harbor Wholesale Roseburg (HWR) through the GDSN (Global Data Synchronization Network) and have subscribed to a GDSN Certified Data Pool other than Syndigo.

Suppliers currently publishing item information through the GDSN for their Retail Trading Partners will need to populate additional data attributes to meet the HFG requirement.

The following options are available to these Suppliers:

Option 1: GDSN – Exclusively utilize GDSN to publish attributes to HFG. Core attributes are the minimum requirement in order to publish to HFG.

Option 2: GDSN Plus – Provide a portion of required attributes via GDSN and additional attributes to Syndigo directly to fully satisfy the HFG requirement. Core attributes are the minimum requirement in order to publish to HFG.

All communication related to the HFG implementation must be directed to Syndigo. Your Syndigo contact will review the options available to you and recommend the option which best suits your company's needs.

Harbor Foods Group – Contacts

1. For Suppliers who have an existing relationship with Syndigo, please contact your assigned Syndigo Account Manager. If unsure of whom your contact is, please reach out to Syndigo at <https://www.syndigo.com/support/>.
2. For Suppliers who would like to reach out to Harbor Foodservice Directly. Please Contact Melinda Miller, Melinda.Miller@Harborfoods.com
3. For Suppliers who do not have a pre-existing relationship with Syndigo, please visit <https://www.syndigo.com/request-demo/>.

HFG GLN Information

Harbor Foodservice Production GLN : 0860005771806

Harbor Wholesale Lacey Production GLN : 0868003000102

Harbor Wholesale Roseburg Production GLN : 086800300119

HFG Data Synchronization Environment

Data Pool: Syndigo

System: Syndigo Portal

This Harbor Foods Group Data Synchronization Implementation Guide, any attachments thereto and any information contained therein are intended only for use by Harbor Foods Group and its subsidiaries Harbor Foodservice and Harbor Wholesale's electronic trading partners. You are hereby notified that any dissemination, distribution or copying of this document, any attachments thereto or any information contained therein is strictly prohibited except for the purposes of implementing data synchronization with said companies.

Option 1 : Publishing to HFG via the GDSN

Publications

1. HFG requires their suppliers to publish all products that they would like to make available for sale to HFG.
 - a. Products HFG currently purchases.
 - b. Products the Supplier would like to make available to HFG for purchase in the future.
2. For the first HFG publication, Suppliers are to publish all products as “Initial Load”.

Implementation Overview

The following outlines the key steps to implementation:

Implementation Steps

1. Initiate the GDSN trading partner relationship
 - a. Contact Syndigo to confirm your implementation option
 - b. Review the list of required attributes in this document
 - c. HFG will create a subscription based upon your GLN
2. Syndigo will provide a username and password to the Syndigo Portal to assist with Rationalization, Item Change and New Item Setup procedures
3. Prepare product data for Publication
4. Publish all products as “Initial Load”
 - a. Confirm with Syndigo how initial publication should be sent
5. Login to Syndigo portal for product status to complete the Rationalization process and investigate “Review” CIC responses
6. Ongoing publications to be sent with “New” or “Update” status. To Inactivate a product, send as “Delete”.

Catalog Item Confirmations (CIC's)

HFG will automatically return a CIC to the Supplier. The CIC sent will be based upon the following:

GDSN Response Messages:

Accepted: Transmission received and can be processed.

Exception: Transmission received but contains XML or GDSN validation error - will not be processed.

CIC Messages:

Accepted: product has been received and has passed HFG GDSN validations. This response will typically be sent within a few hours after receiving the publication.

Reviewed: product does not pass HFG GDSN validations or product has been matched (Rationalized) with a HFG catalog item but has failed HFG's audit process and therefore has data discrepancies to be reviewed and addressed. Reason for Review status will be transmitted in CIC999. This response may follow an Accept message and may take several days to resolve.

Synchronized: product has been published to HFG's internal system and will be updated as revisions occur. This response will be sent after all validations and audits have been successfully completed.

Rejected: product has been de-listed by HFG. The item will revert back to Eligible with an Accepted CIC status (if passing audit) or Review CIC status (if failing audit) the following week. If required, item can be published to Syndigo as a delete following the Accepted or Review CIC status.

Option 2: GDSN Plus – Providing Additional Attributes to Syndigo

Your Syndigo contact will walk you through the various implementation options available to your company with this method.

Product Images Guideline Updates

HFG needs a minimum of 4 High Resolution images for each sku. 1 Primary image and 3 or more Supporting images. The Primary image is the first and most important image on each product page. This image sets the customer's expectations. Supporting images help the customer to identify the product throughout its stages.

- 1a) Styled / Plated - **Primary** (food)
- 1b) Out of the Box - **Primary** (non-food)
- 2a) Raw Form (food) - **Supporting**
- 2b) Worn (non- food) – **Supporting**
- 3a) Inner Pack - **Supporting**
- 3b) Used (non-food) - **Supporting**
- 4) Open Case, showing Inner Packs - **Supporting**
- 5) Closed Case, showing Labels and Item Codes - **Supporting**

For High Resolution Images

Minimum image size per side: 200 mm (8.0 in.) (2400 pixels)

Maximum image size per side: 400 mm (16.0 in.) (4800 pixels)

File resolution: 300 dpi

Square aspect ratio is maintained (1:1) for automatic processing

Please contact Melinda Miller at Harbor Foodservice, Melinda_Miller@Harborfoods.com, for any questions about the image guidelines that HFG requires.

Required HFG Product Attributes

Legend		
M = Mandatory Minimum subset of attributes that are required for HFG to receive publication.	R = Additional attributes requested by HFG Company to fulfill the complete data requirement.	C = Conditional
