1 STEPS TO BEGIN SYNCING YOUR DATA WITH IPC

- 1. Load accurate item information into your GDSN certified data pool provider
- 2. Review attribute requirements in Section 3 of the IPC Implementation Guide
- Complete the required information on the IPC Trading Partner Form located on the IPC Landing Page.
 - a. IPC will create a subscription for the Information Provider GLN(s) submitted via the Trading Partner Form.
 - b. This is a required step to trigger the data sync process.
- 4. Publish information for all items sold to SUBWAY® including SUBWAY® branded items and manufacturer branded items.
 - a. Publish to IPC and ALL Distributors and Redistributors that carry your items.
 - b. IPC GLN to publish to: 0825146000000 "Doctor's Associates, Inc."
 - **c.** IPC Contact Email: ipcgs1@ipcoop.com
- 5. Publish items for all Target Markets.
- 6. Publish CASE level information only for SUBWAY® branded items
- 7. Publish item data with the appropriate Publication Types of 'Initial Load' or 'New'.
 - a. "Initial Load" for existing item information (items already sold in system).
 - b. "New" for brand new item introductions
- 8. Publish "Phase 1" (Supply Chain information) required attributes for ALL new items via the GDSN immediately after a GTIN is issued
- 9. Publish "Phase 2" (Nutritionals and Marketing information- including images) required attributes for ALL new items via the GDSN immediately after a GTIN is issued
- 10. Suppliers can use the **brandDistributionType** flag in each publication to tell distributors to relax their validations and allow proprietary items to bypass their audits for additional item information
 - a. Please contact your data pool for assistance with populating this attribute.

2 CIC RESPONSES

IPC will provide feedback on publications using the Catalogue Item Confirmation (CIC) responses.

- 1. Suppliers can expect to receive CICs within 2-3 hours of IPC having received the publication.
 - a. **RECEIVED**: IPC received the product information but no business decision has been made on the data.
 - b. **SYNCHRONIZED**: Product information passed the IPC mandatory requirements and/or audits and was successfully uploaded to their internal system.

- c. **REVIEW**: Product information did not pass the IPC audits and action is required on the Supplier's side to update the product information.
 - i. Data provided in GDSN is compared to IPC's internal systems.
 - ii. CIC Reviews will be returned if any item has a discrepancy that is out of tolerance for weights or dimensions compared to IPC's internal system, or if an item does not have all the required the fields needed (such as individualUnitMaximumSize).
 - iii. Please note: IPC uses the Status Details to provide additional information on what was discrepant.
 - iv. If GDSN data is correct supplier needs to send an email confirming GDSN is correct for GTIN's listed in email, and IPC system will to be updated with GDSN data
- d. **REJECT**: IPC does not buy this product and does not want to synchronize on the product information.
- 2. Continue to send changes and corrections for all items via the GDSN process.
- 3. Ensure your case weights and dimensions are accurate using a cubiscan and following package measurement rules as per GS1.
- 4. Manufacturers will be scorecarded on data quality.

ATTRIBUTE REQUIREMENTS

3.1 IPC Mandatory

In addition to the GDSN mandatory attributes, IPC requires the attributes in the tables below. Please note that failure to provide these attributes will result in a REVIEW CIC being generated back to the Supplier and the data will not be integrated into IPC's backend systems until these attributes are provided.

Data Synchronization Implementation Guide

PACK SIZE ATTRIBUTE REQUIREMENTS

IPC requires that the Pack Size provided via your publications accurately reflects the way the product is packaged. Please see below for guidelines on how to populate the fields that are used to develop the Pack Size. These guidelines must be followed for all SUBWAY® branded items published at the CASE level only. No other hierarchies should be published for SUBWAY® products.

GDSN Attribute Name	GDD Tag	Values Needed for Your Product: 6 trays of 30 cookies each with a net content of 1.7 oz.	Definition
Net Content with UoM	netContent / UOM	180 EACH	This needs to be the Net Content of the CASE.

Pack Size Text	shippingContainerQu antityDescription	180/1.7 OZ BAGNBOX BULK PACK	Should accurately reflect the way the product is packaged and should include information regarding the type of items in the case: bottle, jar, jug, bag
Individual Unit Maximum & UOM	individualUnitMaximu mSize / UOM	1.7 OZ	The maximum or largest size of the individual unit inside the lowest level of packaging expressed as a measurement. In this example is the net content for each individual cookie.

IPC Recommended

The attributes in the following table are strongly recommended to be populated. Failure to provide these attributes will not result in a REVIEW CIC being generated and the product information will be integrated, however, at a future point in the data synchronization process, IPC will call upon you to provide these attributes. The information in the following table is necessary for SUBWAY® Operating divisions.

This flag indicates to distributors to relax their validations and allow proprietary items to bypass their audits for additional item information such as nutritional or marketing data. If you have any questions, please contact your data pool and they will assist you with populating this attribute. **IPC will accept Nutritionals and Marketing information (including images) to be published as long as the nutritionals information is published per 100 grams and not per serving size.

Version 11

3.3 Phase 2 Foodservice Attributes

IPC now requires suppliers to publish all applicable Phase 2 attributes. Note: REVIEW CICs will not be sent back at this time for missing marketing, nutrition, allergen information. Please see the list of Phase 2 categories below. Also, notice the following attribute tables outlining the required attributes for each category.

Phase 2
