Saladino's Data Synchronization Information	21

Overview

Saladino's Foodservice joined the Global Data Synchronization Network (GDSN) to receive accurate, complete, and timely product content from its supplier partners. Saladino's quickly realized how vital this is for our success in marketing and efficiently distributing our supplier partners' products. Saladino's Foodservice encourages suppliers to utilize the GDSN as the primary method for sharing product content.

This document is intended to assist suppliers in both, joining the GDSN, if they haven't already, and to help understand the attribute requirements and steps Saladino's requires before we can begin to synchronize with your product content in the GDSN.

Chose a Data Pool Provider

The first step to join the GDSN is to choose a GS1 Certified Data Pool Provider from the following site:

<https://www.gs1.org/services/gdsn/certified-data-pools>

Think of the following comparison, when we talk about GDSN and a Data Pool Provider.

GDSN = Cellular Service

Data Pool = Cellular Service Provider (Verizon, AT&T, T-Mobile, Etc.)

Note: You may choose any GDSN Certified data pool, not necessarily the same data pools as your trading partner. Also, you only need to select one data pool to connect with all of your trading partners.

The following document should help you determine what Data Pool Provider best fits your needs:

[How to Select a GDSN-Certified Data Pool](#)

Note: Saladino's Foodservice chose Attribytes for their data pool provider, as it was the best fit for us.

Attribytes Website:

<https://attribytes.com/#whyAttribytes>

Determine who to publish to (UniPro or Saladino's)

Once you have your accurate item data loaded into your home data pool and ensure it is ready for publication, then you can proceed to accept our subscription request.

Note: Contact your data pool for any education you might require in loading your items into your new data pool.

Saladino's Foodservice is a UniPro member, and one of the benefits of being a member is that we can receive your GDSN publications through UniPro. Please review the two publishing options below to determine which method makes sense for your organization.

Subscribing and Publishing to UniPro (Preferred Method):

We very much want our suppliers to realize the benefits of publishing to us through the GDSN. With that in mind, we have found that by funneling the product data through Unipro's GLN, we are able to potentially simplify the costs for the supplier. Publishing to Unipro has the effect of making that product data available to all the distributors that are currently Unipro members, which could reduce the number of GLNs a supplier would need to publish to (and hopefully reduce their publishing costs).

Subscribing and Publishing to Saladino's Foodservice:

We still maintain our GDSN recipient GLN as an option for circumstances that require a certain degree of exclusivity (e.g. private label items, etc.). If it is your preference to only publish directly, then we gladly accept that arrangement as well.

Data Recipient GLNs:

UniPro's GLN: **0018687000008**

Saladino's GLN: **1100001015337**

Accept our Data Pool Subscription Request

To accept our GDSN subscription request, please visit the following site:
www.attribytes.com/gs1subscription

Please fill out the form so that our data pool (Attribytes) can initiate the subscription process.

Note: You will be asked to check a box for the recipient you are accepting subscription to (Chose UniPro or Saladino's). You will be notified once the subscription is set and when we are ready to receive your publications.

Publish your product data

Once you've received confirmation from our data pool (Attribytes), then you can publish your products, or your entire product catalog, to the GLN which you accepted the subscription to (UniPro or Saladino's).

Data Recipient GLNs:

UniPro's GLN: **0018687000008**
Saladino's GLN: **1100001015337**

Saladino's Foodservice Attribute Requirements

Saladino's Foodservice encourages suppliers to publish all GS1 foodservice attributes including supply chain, nutritional, image and allergens.

GS1-Foodservice GDSN Attribute Guide:
[GS1/FoodserviceAttributeGuide](#)

Please see both required and desired Foodservice Attributes that Saladino's wishes you can provide.

Note: Your data pool provider should be able to assist you with any questions you might have about this.

Required Saladino's Foodservice Attributes List:

Product Image Requirements

Saladino's Foodservice follows the recommendations of the GS1 US Foodservice Initiative. [GS1 US Foodservice GDSN Product Images Application Guideline](#)

Managing your Published Items

As Saladino's Foodservice receives each item, you will receive a CIC "ACCEPT" response. Once you receive this response, no further action for that item is needed on your part.

Later, as Saladino's Foodservice reviews and synchronizes your item, you will receive a CIC "REVIEW", "SYNCHRONIZED", or "REJECT" response as appropriate. If you should receive a "REVIEW" response, please respond to the associated message by correcting the specified data or contacting Saladino's Foodservice for clarification.

Accept:

Item information has been received by Saladino's Foodservice Data Pool and is ready for review, but no business decision has been made about that data.

Review:

Item information did not pass internal validations or audits. Please review the message that is contained within the CIC message, address the data discrepancies and republish the item.

Synchronized:

Item information has passed internal validations and audits. The item has been synchronized.

Rejected:

Saladino's Foodservice does not need to synchronize the item currently. This message status means that your GDSN Data Pool has been instructed not to deliver any more updates for this item to Saladino's Foodservice.
