

## GDSN

Making the switch is as easy as...

Today

---

If your items are accurate and updated, manually pull or request a Data Extract from your current GDSN provider.

Today

---

Let us handle the transition from your Data Extract into the Syndigo spreadsheet.

After receiving your extract, send us a copy "as is" and we will have your data transitioned into our spreadsheet and ready for upload.

30 days out

---

Most data pools require a 30-day notice of non-renewal prior to your contract expiration date.

Sending a GLN purge request will act as a formal notice that you will be making the switch to Syndigo.

1-2 weeks out

---

Your data is transferred and you are almost ready to publish through Syndigo.

We will activate your account and give you access to our portal so that you can upload your spreadsheet and have your items ready to publish.
